

CABIN SOLE RS

Cabin Sole Rubber Stripe

Cabin Sole Rubber Stripe flooring panels for interior are flooring panels with a top layer of 1,4 or 2,4 mm teak veneer. These cabin sole panels have a standard size of 50 mm between stripes and the width of each stripe is 5mm. Other distances between stripes or stripe widths are available on demand. The core panel is okoume (gaboon) ply-wood and is available in many thicknesses. The bonding of the veneer is of exterior quality. The rubber that is used for the stripes is similar to the rubber used for laying teak decking.

Properties Cabin Sole RS:

- Exterior quality
- The use of real veneer creates a luxurious atmosphere.

Application of Cabin Sole panels:

- Flooring yacht building (interior and exterior)

Standard sizes:

- 250 x 125 cm or 305 x 125 cm;
