

SANDWICH PANEL PET FOAM

Sandwich panel PET Foam

SANDWICH PANEL PET FOAM is a super light sandwich panel with a structure of a PET Foam core and waterproof bonded marine plywood on each side. The plywood as well as the PET Foam core can vary in thickness and weight.

The PET Foam varies from 65 - 250 KG/m³, starting from a thickness of 5 mm.

SANDWICH PANELS PET FOAM have excellent construction properties.

The panels are made in standard sizes as well as special structures.

Also possible with other plywood on each side.

Our SANDWICH PANELS PET FOAM are used in motor- and sailing yachts and furniture.

Structure PET Foam:

- High temperature resistance
- Limited density variation
- Recyclability & sustainability

The PET Foam is also available in a Fire retardant, self-extinguishable version.
